授業の目的 Objectives of the Course	Recently, most of investigators in life science and medical fields concentrate to clarify the mechanism of genetic factor-mediated diseases. Therefore, the correlation between gene and disease is rapidly clarifying. However, not only genetic factors but also environmental factors significantly affect development of various diseases. Nevertheless, clarification of correlation between environmental factors and diseases is delayed. Occupational and Environmental Health is focusing to prevent environmental factor-mediated diseases through clarification of mechanism for the disease using scientific and political methods.
