講義概要 Course Content	<p>Many regulations restrict both medical administration and practice. The fundamental concepts of criminal laws, civil laws, and administrative laws are briefly described; more specific laws relating to medical administration and practice in Japan will be discussed. The application of bioethics in health services are also the subject of this course. Knowledge on legal and ethical issues will be useful for the participants to develop health policies. Some specific lectures on analytical toxicology and DNA polymorphism, which are widely used in legal medicine, will be also given.</p>
