大学院学生各位
To All Graduate Students

平成 30 年度
基盤医学特論 開講通知
Information on Special Seminar Tokuron 2019

Lecture 1

Title: Can the control of uremic toxin improve renal outcome in patients with advanced renal dysfunction?

Teaching Staff: Prof. Yon Su Kim, MD., PhD.

Department of Internal Medicine, Seoul National University College of Medicine, Korea

Prof. Yon Su Kim is principal investigator of “Kremezin Study Against Renal Disease Progression in Korea (K-STAR)” and president of Korean Society of Nephrology. Uremic toxin has been highlighted as a key player in deterioration of renal function, onset/progression of cardiovascular disease and anemia. In this lecture, the newest result of K-STAR will be presented.

Lecture 2

Title: Long term complications in early onset type 2 diabetes

Teaching Staff: Prof. Meda E. Pavkov, MD., PhD.

Epidemiology and Statistics Branch, Centers for Disease Control and Prevention, USA

Prof. Meda E. Pavkov is director of the Kidney Health Initiative in the United States and conducts The Longitudinal Study of Markers of Kidney Function, supported by CDC and NIH, and several national and international research projects include the Chronic Kidney Disease (CKD) Surveillance project and Global and country-specific rates and trends in incidence of diabetes and CKD. In this lecture, Prof. Pavkov will present recent advancement on long term complications in early onset type 2 diabetes.
